THE SUBURBS SHOWS GAINS

First Ten Months of '35 100 Per Cent Over Last Year

A gain in new suburban building in October of 215 per cent over last year and of 9 per cent over September, 1935, again indicates that the revival of building in the Chicago region is now firmly grounded and that continued improvement may be depended upon.

The figures to be compared are \$1,695,002 for October, 1935; \$538,-874 for October 1934; and \$1,557,-677 for September, 1935.

The great improvement began in March when for the first time since December, 1931, with one exception, the amount of building permits issued in the fifty-three towns reporting to this survey exceeded \$1,-000,000. The following figures show the tremendous change for the better which has occurred.

TIMES WHEN CIRCUMSTANCES CALL FOR QUICK ACTION

History informs us that at certain times, in certain tight-spots, our Puritan fathers forgot they were pure, and ended up with a quick get-a-way from some dyed-in-the-red Indian land-holder using bow and arrow tactics, in a surprisingly ticklish manner.

The bow and arrow days are over, (we hope), civilization forces us to seek other means of inducing action.

Constant trade-ins on the new 1936 Ford V-8's are cramping us for room-so we are going to use a little bow and arrow tactics on prices - in other words we "shoot-the-works."

On Tuesday after a passionate appeal by Victor Olander, secretary of the Illinois Federation of Labor in favor of unemployment compensation the hearing was given over to the opponents.

Mr. Olander said that the workers prefer governmental control rather than to be left to the tender mercies of their bosses. He minmized costs and emphasized con-

He felt that the American people were now restless under taxation. (It is estimated that the tax to Illinois industries will be \$20,-000,000 in 1936, \$40,000,000 in 1937 and \$60,000,000 in 1938) and that the only dependable cure for unemployment was employment in pri-

vate enterprise. The second speaker, D. G. Sherwin of the Caterpillar Tractor Comcould do away with depressions by legislation we would not have them. "How do we do away with unemployment? By production.' He said that when we have prosperity we have a large volume of production and when we have a depression we have lessened production. When purchases stop-production stops, and he felt this would happen with the increased prices which would eventually re-

sult from such legislation.

Of particular interest to the residents of the seventh district were the arguments in opposition by Robert I. Pierce, secretary of the Manufacturer's Association of Chicago Heights. He said, "Twenty-five industries in the 7th District paid in wages \$8,690,000.00 in 1934. These industries paid real estate and personal property taxes in 1934 of \$204,766.00. Even a 2% payroll tax for unemployment compensation would have cost these employers \$173,800.00 and 1/2 % would have cost their employees \$44,-000.00, a total of about \$218,000.00." David R. Clarke, counsel for the Illinois Manufacturers Association emphasized the constitutional side of the question. He brought out the fact that the taxes collected do not go into the treasury of the State of Illinois but o a Commission set up by the bill which will turn over all funds to the Secretary of the Federal Treasury. This is contrary in his judgment to the State Constitution.
